Levi Gay, Collett and Alfred Gay and John I. Sharp have returned from an automobile trip to Pittsburgh, Wheeling and other cities.

Mrs. Gladys Baker returned to Wheeling Friday, after spending her vacation at Atlantic City, New Jersey, and a visit here with her mother, Mrs. Annie Warwick.

Dr. and Mrs. E. W. Price and little daughter Rose Mary, of Washington came Friday night to spend a few days with home folks. They were accompanied by Miss Betsy Price, who is librarian at the Washington and Lee High School at Clarendon, Va.

The Chesapeake and Ohio Railway has had a force of men on the head of Stamping Creek, quarrying a car load of Pocahontas marble. This will be dressed and polished and built into a wall at White Sulphur Springs to advertise to the world the fine marble deposits of the Little Levels District. Three good colors have been found: a deep maroon, a dove gray, and a black. Samples of the quality is substantial, and the tensile strength has been proved out. The fact that our railroad is taking an active interest in bringing this fine stone to the attention of the building trade is matter of great satisfaction to us all who are so greatly interested in the development of the resources of this Valley.

MINNEHAHA SPRINGS SOLD

LeRoy R. Johnson and John F. Richter, of Washington, were here this week and closed negotiations with Mrs. Maggie E. Lockridge for the purchase of Minnehaha Springs. With the springs are included the hotel building, bath house and sixty-five acres of land. It is the intention to place the water on the market as a medicinal water and improve and develop the property as a watering-place. It is not expected now to begin this work of development before next spring.

The purchasers have had experience in developing and marketing medicinal waters, and they now have a property that will fulfill all requirements when properly advertised and placed upon the market.

Minnehaha is one of the big thermal springs of the country. It gives a never ebbing flow of clean pure water. Though furnishing a volume equal to the flow of a small river, it differs from the large, underground streams of this region in that it comes from such great depth that its waters are warm and uniform in volume the years through.

For generations its healing and medicinal properties have been known locally and sought. It is free of surface contamination and so pure that it remains fresh when shipped and stored.

Boy's Solemn Promise

Reassuring to Father

A decidedly good story is one amusingly told by the father of a boy who is taking a medical course at a nearby college. Medics go to school long, and the son in this case had been demanding money for this, money for that, money for the other thing—the father patiently paying all the while.

The lad's most recent trip home resulted in a pleasant visit with the family, but Dad was waiting for the "expected touch" that would come at the close. It came.

As the parent laboriously drew his wallet from his pocket and started to pass out some bills that it contained, he said whimsically:

"Son, when you get all rich and prosperous and become one of the town's most popular doctors, will you take me to the poorhouse in your Rolls-Royce?"

"Yes, father, I will," came the absolutely unsmiling answer.—Kansas City Star.

Bear Sanctuary Needed

to Save the Grizzlies

There are a few thousand grizzly bears left on the Alaskan islands of Admiralty, Baranof, Chigochak and Kodiak, but the trouble is that all these islands are surrounded by numerous small islands on which foxes are raised for commercial purposes, and the men who raise foxes kill the grizzly and brown bears when they visit salmon-spawning streams in summer. The bear meat is used for fox food. It is also reported that the crews of the salmon fishing vessels kill many bears.

Protecting the bears by placing a yearly bag limit on them will not save them. What is needed is a bear sanctuary. Congress has vainly been appealed to pass a bill designating one of the above-mentioned islands as a bear sanctuary, making it unlawful to harm any of the bears at any time on this island so designated.

Copernicus

A few Greeks had believed that the earth revolved on its axis and that the sun, planets, revolved about the sun, but the theory that the universe was fixed as the center of the universe was generally accepted until the sixteenth century. By bringing forward convincing arguments for the views that the sun was the center of the solar system, Copernicus revolutionized astronomy and gave a great impetus to astronomical study. Furthermore, by seeming to displace the home of mankind from the central place in the universe he opened the way for doubts as to whether God had created the entire universe for the benefit of man.

England's "White Horses"

There are three "White Horses" in England, one in Berkshire, one on the downs three miles east of Westbury in Wiltshire, and a third at Lulworth near Weymouth in Dorsetshire. On the top of the White Horse hill in Berkshire is a magnificent Roman camp, complete as if left only a few years ago, and on the downs at Westbury the earth works are as perfect as any could be found in France from the World War. As these two horses are only a few miles apart, with their camps, there seems good reason for believing the legends told of them to be founded in fact. There is no doubt that battles were fought in that section. The Dorsetshire horse was cut to commemorate another event.

Work is progressing on the Averill

State trout nursery at the Big Spring on Stony Creek. The roof is on the large building, which will contain the fish-troughs on the ground floor, with living apartments on the second story. This is a fine, big, well appointed house, well planned and attractive appearance. A strong cement dam has been completed, holding the springs near the source in a good sized storage pool. All this dry summer through these springs have furnished a flow of eight or more inches of water. The water is conveyed to the troughs and pools in a six inch pipe. A well graded road has been built from the building to the pool at the head of the springs. A substantial wire fence encloses the several acres owned by the State. Some work has been done cleaning up the grounds, care being taken to preserve the many trees on it. With the building of ponds and the planting of more trees, Averill State Trout Nursery grounds will be the beauty spot of this region.

B. E. Smith was over to Elkins on

business, Monday

DIED

WILLIAM J. KRAMER

William J. Kramer, 63 years old, a widely known resident of Roncoverte, died at his home on Pocahontas avenue early Monday morning, September 19, 1932, after suffering a stroke of paralysis two weeks ago. Mr. Kramer was born at Catawissa, Pennsylvania, and came to Roncoverte when a small boy, growing up with the city. For a number of years he was connected with the furniture business of his father and brother, but for some years past has conducted an electrical supply business. He was the second son of the late Ephraim L. Kramer, and is survived by his widow; two daughters, Mrs. Percy P. Eagle and Miss Alice Kramer, of Roncoverte; one son, W. Brent Kramer, of Pittsburgh, Pa.; two sisters, Mrs. John A. Sydenstricker of Marlinton, and Mrs. Samuel L. Jackson, of Roncoverte, and one brother, Mr. Luther E. Kramer, also of Roncoverte. Funeral services were held at 5 o'clock, Wednesday afternoon at the home Wednesday afternoon at 5 o'clock, conducted by his pastor, Rev. Aubrey N. Brown, of the First Presbyterian Church, with burial in Riverside cemetery.—W. Va. News.

JOHN WESLEY MORRIS

John Wesley Morris, for more than thirty years a railway postal clerk on the Greenbrier division of the C. & O. Railway between Roncoverte and Bartow, was found dead in bed at his home in Monroe avenue early Sunday morning, September 18, 1932. He had passed away in a heart attack some time during the night. His age was about 65 years. He had long been a devout member of the First Methodist Episcopal Church and was for a number of years secretary of the Greenbrier Sunday School Association. Surviving are his widow, an invalid; a son by a former marriage, McKinley Morris, of Hinton, Md.; an adopted daughter; four brothers, George Morris, of Tunnelton; Russell Morris, of Davis; Edward and Harrison Morris, of Keyser, and one sister, Mrs. W. R. Berg, of Keyser. Funeral services were conducted by Rev. J. B. Cook, his pastor, and burial was in Rosewood cemetery at Lewisburg. Active pallbearers were I. W. Foiden, Lawrence Sherwood, Ferdinand T. Hursthal, Mason Hayes, H. E. Wiseman, John McAllister.—W. Va. News.

PERMISSION AMERICAN FRUIT

The persimmon is a native fruit and grows wild throughout the eastern United States from Connecticut to the Carolinas and westward to Missouri and Arkansas. The American persimmon is a close relative of the Japanese persimmon, or date-plum, which came originally from China. This tree bears a larger and much less attractive fruit than the American species and is more tropical, having been grown successfully in southern California.

where he was born. He was a solid, substantial and sturdy citizen, fulfilling the traditions of the fine pioneer families from which he came.

H. B. MORGAN

H. B. Morgan died at his home very early Wednesday morning, September 28, 1932. His age was sixty-three years. He had been in failing health for some time. The immediate cause of his death was a stroke of paralysis. His body will be buried Thursday afternoon at Barber, Virginia; a short service will be conducted by his pastor, Rev. K. V. Bowen, at the home on Thursday morning at 9:30 o'clock. He is survived by his wife, Mrs. Florence Perkins Morgan. Thus we note the passing of a leading business man of Marlinton.

Mr. Morgan was born and reared at Pearisburg, Virginia. At the outbreak of the Spanish-American war he volunteered in the regiment of soldiers immune to yellow fever. He saw hard service in Cuba. Later he joined the regular army and saw long and honorable service in the war to suppress the insurrection in the Philippines. Twenty-nine years ago he came to Marlinton. For some years he was employed at the Greenbrier Tannery. Going into business for himself he was very successful.

Some weeks since he witnessed a profession of his faith. "Soldier, rest, thy warfare o'er."
